

HR160 Handrail

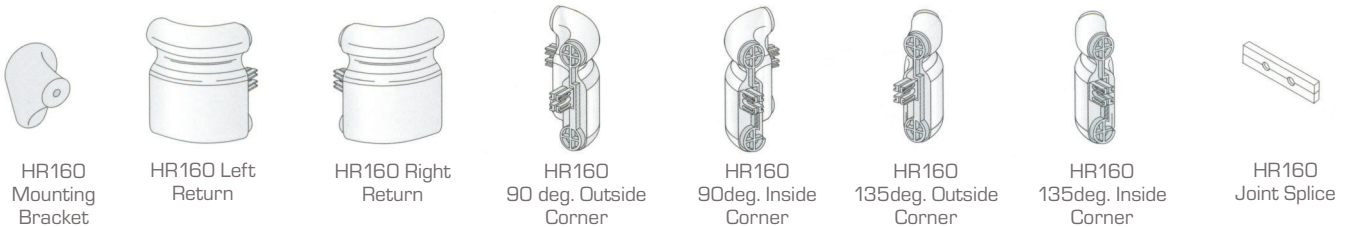

Dimensions shown are nominal.
Illustrations are not full size.

Product Summary

HR160 handrail system is designed to offer impact protection against damage from trolleys, wheelchairs, beds and mobile equipment and provide hand support. With a strontium based high output photoluminescent light source giving excellent visual wayguidance and the unique tactile cues to provide directional information to visually impaired visitors and patients, it offers service providers a cost effective and common sense solution to some of their legislative requirements under Part III of the Disability Discrimination Act and helping to comply with the Regulatory Reform (Fire Safety) Order 2005, Section 9 - Healthcare Premises.
